-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-11 remain for examination.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claim 1, it is not clear how the bypass is different from the path transferring the data or what is the source and destination of the bypass.

(b) Claim 1, it is not clear on what the generation of the sign bit is based.

(c) Claim 1, it is not clear what is the function of the aligner with respect to the data transferred.

(d) Claim 2, it is not clear what are the choices of selection.

(e) Claim 3, it is ambiguous that sign bit is generated by selectively processing a part of the data that is transferred from the cache memory to an aligner.

(f) Claim 5, the same as (a) and (c).

(g) Claim 6, the same as (d).

(h) Claim 7, it is not clear what are the inputs and outputs of the multiplexers.

(i) Claims 4, 8, and 10, the same as (e).

(j) Claim 11, the same as (e) and (h).

Art Unit: 2111

Applicant provided explanations for various deficiencies by referring to the features in the specification, however, those features do not get imported into the claims. The claims do not recite those features and remain deficient.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Simone, U.S. Patent No. 5,638,312, cited in the previous office action.

The rejection is respectfully maintained for reasons set forth in the previous office actions incorporated herein by reference as Simone teaches the transferring of data and sign bits in parallel (col. 8, line 35; see 701).

6. Applicant's arguments filed December 6, 2004, 2004 have been fully considered but they are not persuasive.

Art Unit: 2111

Applicant argued that various noted features are described in the specification and the sign bit do not bypass the aligner (102) and sign bit are provided sequentially as shown by sign extend (809).

The noted features are not recited in the claims and features described in the specification are not imported into claims.

Applicant is directed to the cited features in fig.7 and is reminded that the load aligner (201) comprises data path, sign bypass, and the aligner, wherein the sign bit is provided in parallel with the data bits. The sign extend performs replication of sign bits using the provided sign bit (col. 11, line 47).

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
